- 5. How ChatGPT integration works

Backstory

Whether you're a startup or an established e-commerce enterprise, managing a growing catalog of products and services isn't easy. Writing unique, customer-focused product descriptions takes time.

Backstory

Integrating ChatGPT into your Product Data Exchange (PDE) platform is a great solution. It helps digitize the process while keeping your content fresh and engaging.

About our client

Bygghemma Group is a top Nordic online retailer of home and garden products offering a wide selection through various ecommerce sites.

- A major player in Europe's home improvement market
- 100+ online destinations under the BHG umbrella
- Over 12 years of experience with operations in 25 countries

About our cliet

Client's Pain Points

Time-consuming product description creation and updates

Struggles with managing multilingual content

Slow Al performance in the client's PDE system

Challenges in customizing content for different e-stores

Client's Goals

Save managers time by automating product descriptions and translations

Enable ChatGPT to be used directly within the PDE system

Improve performance by changing the integration method

Let managers customize AI prompts to fit each e-store's needs

Results of Our Collaboration

Effortless product descriptions with just a few clicks

Seamless product description generation and export within the PDF system

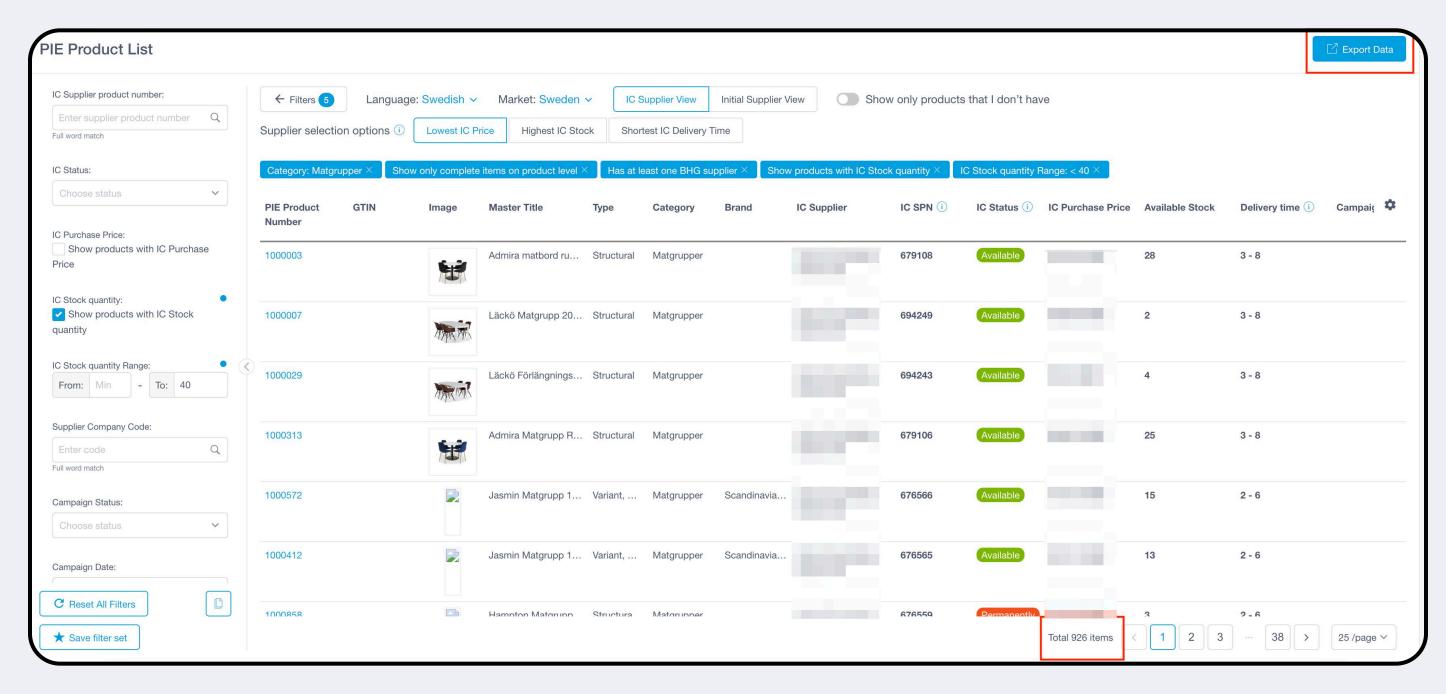

Faster performance after implementing a new integration method

Tailored AI prompts to match the company's audience's needs

How ChatGPT Integration Works

Step 1: Select and Export Products

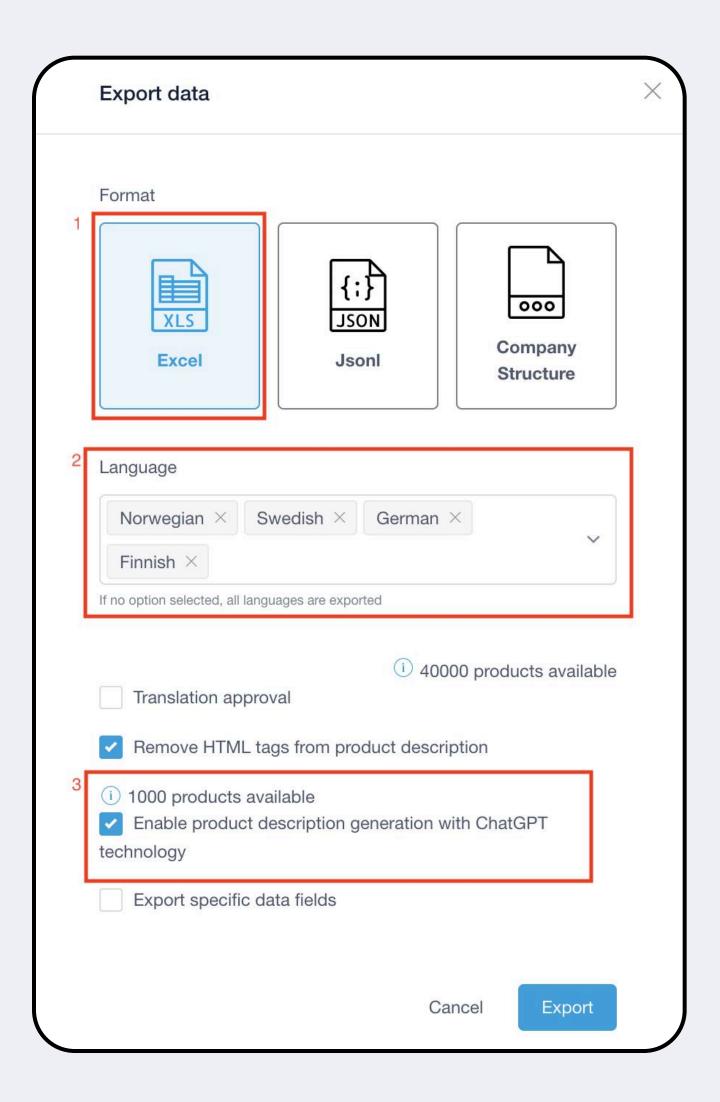

- Managers choose the products that need modifications or updates.
- They make sure that the relevant products are chosen for the process.
- They Initiate the export process to transfer the product data.

How ChatGPT Integration Works

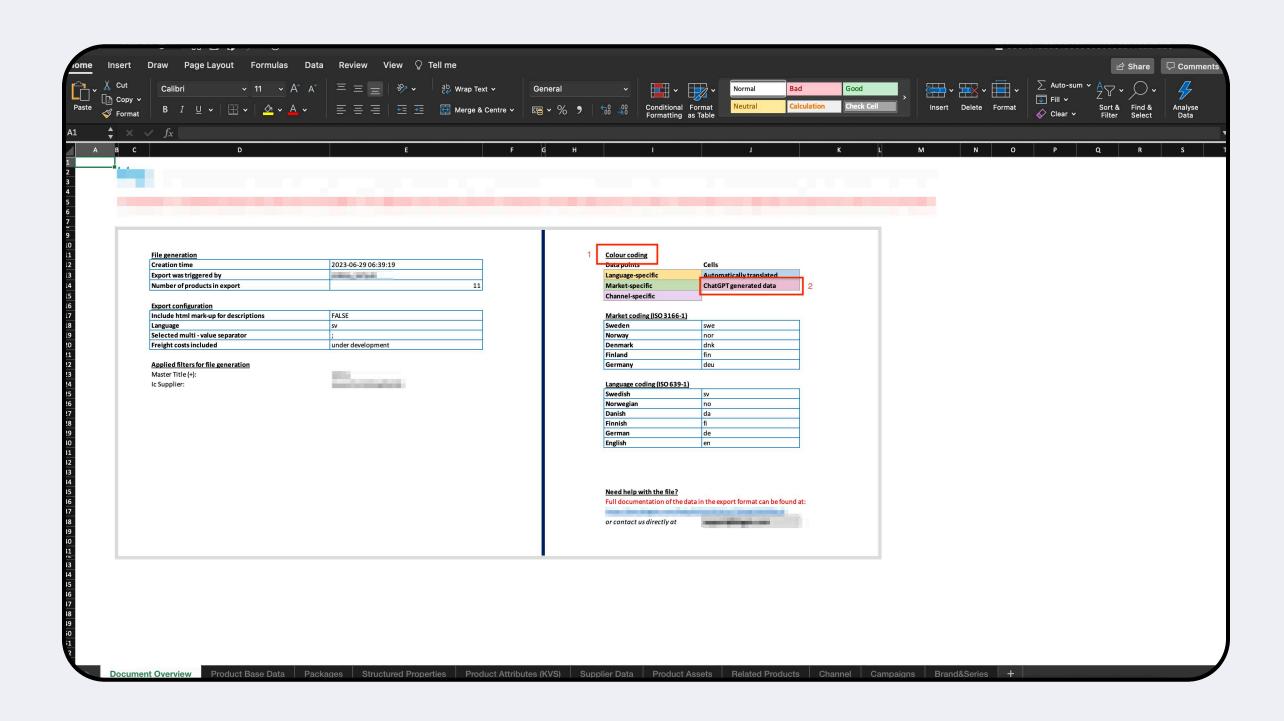

Step 2: Configure the Data Export

- Managers select the format for data generation.
- They choose languages for language-specific data (e.g., title, description).
- If enabled, missing descriptions are generated with ChatGPT for the selected languages

How ChatGPT Integration Works

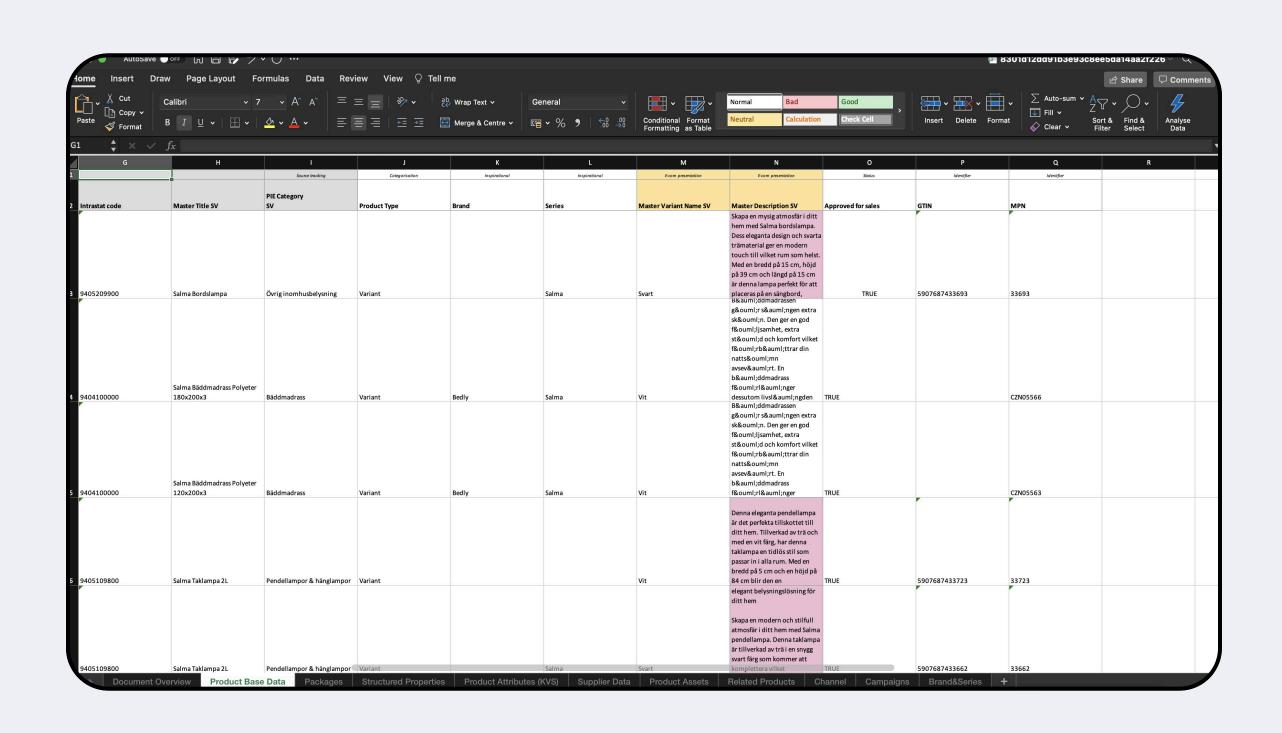

Step 3: Review and Analyze Your Generated Export Data

- Managers open the generated export file in .xlsx format.
- They review the first page, which includes key details related to the export.
- They notice the color schemes applied to different cells for easy navigation.
- They identify the specific color used to highlight data generated by ChatGPT.

How ChatGPT Integration Works

Step 4: Place and Review Product Descriptions

- Managers navigate to the relevant tab in the export file.
- They focus on the "Master Description SV" column, which contains Swedish product descriptions.
- They look for cells highlighted in pink; these are descriptions generated by ChatGPT for missing entries (as explained in Step 2 and Step 3).
